A 57-year-old man consulted our hospital with a painful swelling of the left calf. Physical examination revealed a mass 4 cm in diameter on the medial aspect of the lower leg. It was elastic, firm, and with indistinct margins. Laboratory findings revealed a slightly elevated white blood cell count and an elevated S100-protein level. Magnetic resonance imaging revealed a

mass of 13 cm in diameter involving the lower leg and popliteal fossa. CT and angiography revealed multiple enlarged regional lymph nodes. On biopsy, there was a myxoid spindle cell proliferation. Immunohistochemical staining was positive for vimentin and desmin. The tumor was considered to be high-grade fibromyxoid sarcoma. The patient was referred to a sarcoma treatment center. He refused to undergo surgery, radiotherapy, and chemotherapy. Two years later, he has suffered no symptoms and CT showed no change in the tumor size or lymph nodes. High-grade fibromyxoid sarcoma of the lower extremity has

been reported rarely, and in the present case the patient was relatively young and refused further treatment. To our knowledge, this is the first report of a case of high-grade fibromyxoid sarcoma of the calf muscle.

Q: Вывод массива в список по очереди

Извините за глупый вопрос. Есть массив файлов со строками и нужно сформировать список с массивом как рисунок.

```
int i = 0; list F;
```
